

Pediatric Nutrition History

REASON FOR VISIT & FAMILY PERSPECTIVE

- ☐ **1. Reason for visit and family concerns**
Why the family came in, what's worrying them, what they hope to get from the visit.

GROWTH & NUTRITION STATUS

- ☐ **2. Growth pattern**
How the child has been growing over time — weight/height trends, any recent change.

DIETARY INTAKE & PATTERN

- ☐ **3. Typical dietary intake (24-hour recall)**
Walk through a normal day, organized, start to finish.
- ☐ **4. Amounts actually consumed**
What's actually eaten, not just offered — real portion sizes.
- ☐ **5. Beverage intake**
Milk, juice, water — and how much of each per day.
- ☐ **6. Meal and snack structure**
Number and timing of meals and snacks across the day.
- ☐ **7. Food-group variety**
Whether intake spans the major food groups; which are missing.
- ☐ **8. Foods omitted or refused**
Specific foods avoided, refused, or left out — by category.
- ☐ **9. Dietary restrictions**
Allergy, medical, religious, or cultural limits.
- ☐ **10. Supplements and fortified products**
Vitamins, supplements, or fortified foods/formula in use.

FEEDING SKILLS & SAFETY

- ☐ **11. Feeding skills and independence**
How the child eats — self-feeding, utensils, level of independence.
- ☐ **12. Feeding safety and oral-motor concerns**
Chewing/swallowing difficulty, choking, gagging.
- ☐ **13. Mealtime behavior and environment**
Behavior, distractions, where and how the family eats.

MEDICAL & THERAPY HISTORY

- ☐ **14. Nutrition-relevant medical history**
Illnesses, GI issues, medications, therapies that affect nutrition.

ACCESS, SOCIAL & CARE CONTEXT

- ☐ **15. Food environment and access**
Affordability, availability, who shops and cooks.
- ☐ **16. Activity, sleep, and screens**
As they relate to eating and daily rhythm.

FAMILY PERSPECTIVE & READINESS

- ☐ **17. Prior strategies and family understanding**
What they've already tried, and how they understand the problem.
- ☐ **18. Readiness and realistic goals**
Readiness to change; realistic, shared goals.
